

CARE CHOICES

Inpatient Palliative Care Program

The Inpatient Palliative Care Team is a multi-disciplinary team that assesses and helps to manage patient's pain and other symptoms. They provide support and discuss treatment preferences with patients and their families to help improve patient's and family's quality of life.

Goals of Palliative Care

- Assess and manage pain and other symptoms
- Assess and support patients and family's emotional needs.
- Discuss treatment preferences and advance directives with patient and family
- Coordinate future care in most appropriate setting.
- Improve patient's and family's quality of life.
